DETAILED ACTION

Allowable Subject Matter

Claims 36-46 are allowed.

The following is an examiner's statement of reasons for allowance: a plasma processing apparatus including a plasma tube delivering plasma exhaust into a workpiece processing chamber; *an RF antenna for delivering an RF signal to the plasma exhaust to create a primary discharge, the RF antenna being disposed proximate and exterior to the chamber and separated from the chamber by a dielectric window of the chamber; and a baffle plate assembly for shielding the workpiece from the electric field potential created by the primary discharge and for creating a secondary discharge having higher density and lower energy than that of the primary discharge.*

Neither of the prior art of the record teaches or suggests providing an RF antenna on a dielectric window for creating a primary discharge from a plasma exhaust of a plasma tube, and providing a baffle assembly for shielding a workpiece from the electric field of the primary discharge and for creating a secondary discharge having a higher ion density with lower energy than that of the primary discharge.

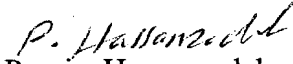

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
